

The local and global network for sharing observations at sea, on the coast and land

**SeeOnSea objectives:**

- Highlight the local environment
- Improve behavior through the dissemination of knowledge

For marine and tourism professionals, and the general public

Observations at sea, on the coast and on land:

- faune
- flore
- phénomènes naturels
- empreinte humaine
- sites remarquables

Take part in protecting nature!

A wealth of information available, taking into account the level of protection of the species and providing appropriate advice

« Better understand your environment to better protect it »

...and SeeOnTrail

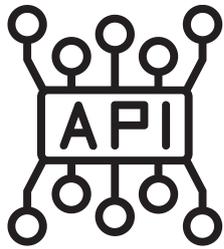

## SeeOnSea API

SeeOnSea makes the functionalities of its concept available via secure APIs.

### API functions :

- o Authentication service
- o List of species and types of Observations
- o Local network observations
- o Observation details and Mini-wiki
- o Observation view confirmation
- o Observation creation
- o Multilingual

To enable you to test the integration of SeeOnSea APIs, a test environment is available.

Available and adaptable to a variety of media: phone, tablet, computer, dashboard...

### Secure access to functionalities

API Rest accessible via a "Token" providing filtered and secure Observations.

Annual subscription (per site or port)\*

490€ HT
