

The Metropolitan Nice Côte d'Azur Tourist Office has done it, join us!

SeeOnSea makes available to the general public and professionals a range of IT products and services entirely dedicated to sharing observations at sea, on the coast and on trails.

The iOS, Android and web apps are free for the general public.

Imagine a map on which Observations are easily shared with the precision of a GPS. Sharing is instantaneous, taking into account the level of protection of the species.

« Better understand your environment to better protect it »

...and SeeOnTrail

SeeOnSeaVIEW

Join SeeOnSeaView for :

- Highlighting your local environment
- Improving human behaviours through knowledge sharing

Observations are of 5 types: fauna, flora, natural events, human footprint, remarkable sites. They can even be created directly on your website.

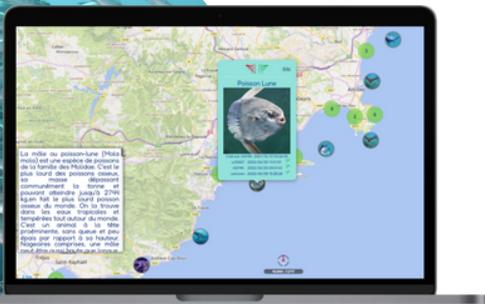

Professionals can record and follow specific species that the general public will be able to see and confirm.

With SeeOnSeaVIEW:

- The website visitor gets additional information about each Observation
- The plug-in is easy to set up and secure
- You control the display options:
 - o your GPS coordinates
 - o marine and/or terrestrial Observations
 - o fauna, flora
 - o natural events
 - o remarkable sites
 - o human footprints
 - o in the visitor's language
 - o ...

"Live" SeeOnSeaView on your website
